

## 49<sup>th</sup> Nordic Seismology Seminar, 24-26 September 2018

The 49th Nordic Seismology Seminar will be held at NORSAR's premises in Kjeller in the time period 24-26 September 2018. The meeting will commence at lunchtime on Monday 24 September and last until lunch on Wednesday 26 September.

### Topics

The Nordic Seismology Seminar has traditionally covered a wide range of topics related to seismological research conducted in the Nordic and neighbouring countries. Among these are:

- Detection seismology, verification
- Seismograph stations, networks, data exchange, data analysis methods, event bulletins
- Seismic hazard assessment, engineering seismology
- Structural investigations of the crust and upper mantle
- Earthquakes, seismicity, seismotectonics, global seismology

We welcome both oral and poster presentations.
